

Scan Conversion for Military Applications

Extremely Detailed Video Output

Use BrightEye Mitto to output detailed maps to 3 Gb/s HD video. Connect your Mac or PC to the BrightEye Mitto through the VGA, DVI or HDMI port on your computer. Mitto outputs full 1080p HD video at 3 Gb/s for maximum detail.

Exclusive Filtering and Scaling Technology

BrightEye Mitto is a high performance scan converter that provides an extremely high quality, detailed video output. Detailed computer images can be converted to HD video for the most demanding display applications.

A superior quality scan converter, BrightEye Mitto uses new, proprietary scaling technology and exclusive multi-tap filtering. Even a small part of the computer screen will be upconverted to full screen HD. The region selected for output determines if Mitto acts as an upconverter or downconverter.

The result is that the output looks as good, or better, than the original and passes the most stringent testing.

BrightEye PC and BrightEye Mac software can be used to select the specific portion of computer video that you want to output. Optionally, front panel controls can be used to make your selection.

The BrightEye Mitto™ family of high performance scan converters are used for the most demanding applications including high-end military, medical, classroom, broadcast, church and corporate. Convert YouTube™, Skype™ video, weather radar, viewer emails and maps to video. Ensemble uses the latest technology in its proprietary upconversion and filtering and that means you have the best looking video.

Six different models, with a feature set and price to meet any need:

BEM-1	BrightEye Mitto 3G
BEM-1F	BrightEye Mitto 3G Fiber
BEM-2	BrightEye Mitto HD
BEM-2F	BrightEye Mitto HD Fiber
BEM-4	BrightEye Mitto Pro 2
