

# Scan Conversion for Worship

## Song Lyrics and Skype from Your Computer to Your Congregation

Select just a portion of the song or hymn lyrics for scan conversion. Feed Mitto's SD or HD SDI output to a video switcher or iMAG system.

### Songs and Hymns - Show Just a Portion

You can easily select just a portion of the song or hymn lyrics for projection. No need to show the entire computer desktop, select just the section you want to project. BrightEye Mitto converts the selected area to SD or HD SDI video for input to a video router, projector or production switcher.

### Missionary Interviews via Skype Made Easy

Use BrightEye Mitto to show an interview with a missionary or off-site guest. You can select just the Skype™ or YouTube™ video window and feed that to Mitto and then to a projector or video switcher.

### Audio Delay for Lip Sync

BrightEye Mitto's audio delay lets you adjust the audio stream with respect to the video and get the lip-sync right, which is crucial for Skype applications.

A superior quality scan converter, BrightEye Mitto uses new, proprietary scaling technology and exclusive multi-tap filtering to ensure the video output looks superior. The filters automatically adjust in accordance with the conversion being performed.

The BrightEye Mitto™ family of high performance scan converters are used for the most demanding applications including high-end military, medical, classroom, broadcast, church and corporate. Convert YouTube™, Skype™ video, weather radar, viewer emails and maps to video. Ensemble uses the latest technology in its proprietary upconversion and filtering and that means you have the best looking video.
